OP 014	The effect of edmodo on academic success in nursing education and students' views about edmodo <u>Ümran Çevik Güner, Vildan Özeke, Mukaddes Demir Acar</u>
OP 015	The effects of mastery learning model and whatsapp assisted learning on development of psychomotor skills in nursing education: a case of nasogastric catheter insertion <u>Nilay Turaç</u>
OP 016	Nursing students' attitudes and opinions towards using web-based nursing diagnosis mobile learning system <u>Deniz Özel, Neşe Zayim</u>
OP 017	The effect of training with simulation on the clinical stress of first grade nursing students <u>Gülten Karahan Okuroğlu, Nuray Şahin Orak, Şükrüye Şahin, Şule Ecevit Alpar</u>
OP 018	A project example in simulation training of trainers for nursing faculties: protsim <u>İlkay Boz, Zeynep Özer, Emine Efe, Ulufer Sivrikaya</u>
OP 019	Preference ranking list of nursing undergraduate programs in Turkey and investigation of the students' preferences other than the nursing program <u>Havva Arslan, Yürümezoğlu, Hatice Çamveren, Gülseren Kocaman</u>
OP 020	High-reality simulations of postpartum hemorrhage management: outcomes before and after clinical practicums in nursing students <u>Merve Coşkun, Ergül Aslan, Vesile Ünver, Ükke Karabacak</u>
OP 021	The effects of web-based teaching on pediatric nursing internship student's self-confidence and anxiety in clinical decision making skill <u>İlknur Bektaş, Figen Yardımcı</u>
OP 022	The effect of jigsaw iv learning technique on academic success and psychomotor skills performance for arterial blood pressure application in nursing students <u>Nasibe Yağmur Filiz, Yurdanur Dikmen</u>
OP 023	Effects of simulation training on the improvement of emergency management skills <u>Eylem Topbaş, Banu Terzi, Öznur Görgen, Gülay Bingöl, Melih Elçin</u>
OP 024	Problems and expectations stated by nursing academicians and students to nursing education association <u>Kerziban Yenal, Havva Arslan Yürümezoğlu, Yasemin Ayhan, Gülseren Kocaman</u>
OP 025	Psychological symptoms and professional values in student nurses <u>Esmâ Bağcıvan, Fatma Güdücü Tüfekçi</u>
OP 026	The effect of social media assisted teaching on motivation of students in nursing education <u>Nilay Turaç</u>
OP 027	Examination of nursing students' medical error attitudes within different educational models <u>Yasemin Ayhan Öncü, Şeyda Seren İntepeler, Selmin Şenol, Canan Demir Barutçu</u>
OP 028	The impact of clinical practice of internal medicine nursing course on empathic tendency and empathic skills of a group of students <u>Burcu Çuvalcı, Aysun Akçakaya, Sevilay Hintistan</u>
OP 029	Nursing students' problems in their education process: a qualitative research <u>Gülcan Taşkiran, Gamze Tunçer, Ülkü Baykal</u>

PROBLEMS AND EXPECTATIONS STATED BY NURSING ACADEMICIANS AND STUDENTS TO NURSING EDUCATION ASSOCIATION

Kerziban Yenal, Havva Arslan Yürümezoğlu, Yasemin Ayhan, Gülseren Kocaman

Nursing Education Association was established in 2007 aiming to develop and maintain the quality of undergraduate and graduate nursing education in Turkey. It continues its activities to reach these targets. Requests, suggestions and problems are communicated to association on many different aspects. In this presentation, requests, suggestions and problems submitted to association contact address and social media account between 2014-2017 will be presented in categories. The most frequently asked issue among these topics are; the fact that public hospitals do not accept nursing students in their areas of practice, the inability of students to perform clinical practice, and students charge fees from institutions. Moreover, the availability of quotas for nursing programs and the need for intervention in this regard have been the most important agenda items of our association. Other issues shared with the association are; problems related to nursing completion program, opinions about the decisions taken by the Council of Higher Education, preceptor nurse course requests, information and opinion requests for the problems experienced by our members and students and share the congress, course and event announcements with the members of the association. It has been determined that students and candidates communicate through social media accounts more. Shared topics in social media account; university and departmental preferences, request for information about the nursing profession, graduate programs horizontal and vertical transition, undergraduate completion programme, and the preparation of homework for undergraduate students. When the sharing of the mentioned subjects is examined, it appears that there is interaction with many educators and nurse candidates who are members and non-members regarding the activities of the Nursing Education Association and the agenda items it watches. It will strengthen the ability of the association to reach a large educational mass and solve the problems that our active members have.
